Virus Research, 13 (1989) 351–353
Elsevier

Contents of Volume 13

No. 1

Research Papers

V.G. Wilson (U.S.A.)
Dual loci of DNA bending in the bovine papillomavirus upstream regulatory region 1

J.F. Evermann, J.L. Heeney, A.J. McKeirnan and S.J. O'Brien (U.S.A.)
Comparative features of a coronavirus isolated from a cheetah with feline infectious peritonitis 15

G.M. Wilson and F.L. Graham (Canada)
The effect of E1 mutations on biochemical transformation by an adenovirus carrying the herpes simplex virus thymidine kinase gene in region E3 29

J.C. Saiz, M.J. Gonzalez, D.O. Morgan, J.L. Card, F. Sobrino and D.M. Moore (Spain)
Antigenic comparison of different foot-and-mouth disease virus types using monoclonal antibodies defining multiple neutralizing epitopes on FMDV A5 subtypes 45

H.C. Schröder, D. Falke, K. Weise, M. Bachmann, M. Carmo-Fonseca, T. Zaubitzer and W.E.G. Müller (F.R.G., Portugal)
Change of processing and nucleocytoplasmic transport of mRNA in HSV-1-infected cells 61

M. Sakurai, T. Nishimori, C. Ushimi and H. Nakajima (Japan)
Nucleotide sequence of capsid protein gene of porcine parvovirus 79

No. 2

Research Papers

R.D. Wesley, A.K. Cheung, D.D. Michael and R.D. Woods (U.S.A.)
Nucleotide sequence of coronavirus TGEV genomic RNA: evidence for 3 mRNA species between the peplomer and matrix protein genes 87

C.J. Wust, J.A.W. Nicholas, D. Fredin, D.C. Dodd, R.J. Brideau, M.E. Levely and A. Brown (U.S.A.)
Monoclonal antibodies that cross-react with the E1 glycoprotein of different alphavirus serogroups: characterization including passive protection in vivo 101

R. Jessberger, B. Weisshaar, S. Stabel and W. Doerfler (F.R.G.)
Arrangement and expression of integrated adenovirus type 12 DNA in the transformed hamster cell line HA12/7: amplification of Ad12 and c-myc DNAs and evidence for hybrid viral-cellular transcripts 113

R.F. Garry (U.S.A.)
Alteration of intracellular monovalent cation concentrations by a poliovirus mutant which encodes a defective 2A protease 129

0168-1702/89/$03.50 © 1989 Elsevier Science Publishers B.V. (Biomedical Division)

S. De la Luna, C. Martínez and J. Ortín (Spain)
Molecular cloning and sequencing of influenza virus A/Victoria/3/75 polymerase genes: sequence evolution and prediction of possible functional domains 143

S. Lain, J.L. Riechmann and J.A. García (Spain)
The complete nucleotide sequence of plum pox potyvirus RNA 157

K. Shiraki, T. Okuno, K. Yamanishi and M. Takahashi (Japan)
Virion and nonstructural polypeptides of human herpesvirus-6 173

No. 3

Review Article

P. Roy (U.S.A., U.K.)
Bluetongue virus genetics and genome structure 179

Research Papers

B.H. Robertson, V.K. Brown and B. Khanna (U.S.A.)
Altered hepatitis A VP1 protein resulting from cell culture propagation of virus 207

H.M. Engelking and J.-A.C. Leong (U.S.A.)
The glycoprotein of infectious hematopoietic necrosis virus elicits neutralizing antibody and protective responses 213

H.L. Nakhasi, D. Zheng, L. Callahan, J.R. Dave and T.-Y. Liu (U.S.A.)
Rubella virus: mechanism of attenuation in the vaccine strain (HPV77) 231

R.M. Iorio, R.L. Glickman, A.M. Riel, J.P. Sheehan and M.A. Bratt (U.S.A.)
Functional and neutralization profile of seven overlapping antigenic sites on the HN glycoprotein of Newcastle disease virus: monoclonal antibodies to some sites prevent viral attachment 245

A. Simmons and A.B. La Vista (South Australia)
Neural infection in mice after cutaneous inoculation with HSV-1 is under complex host genetic control 263

No. 4

Research Papers

A.H. Koyama and T. Uchida (Japan)
The effect of ammonium chloride on the multiplication of herpes simplex virus type 1 in Vero cells 271

L.A. Scolaro, S.E. Mersich and E.B. Damonte (Argentina)
Reduced virulence of a Junin virus mutant is associated with restricted multiplication in murine cells 283

R. Kumar and G.C. Sen (U.S.A.)
Interferon-mediated inhibition of retroviral infection: use of a defective retrovirus carrying a drug-resistance gene 295

G. Palù, F. Bevilacqua, M.A. Biasolo, C. Parolin, M. Tognon, M.G. Romanelli and G.A. Meloni (Italy)
Acyclovir resistance in herpes simplex virus type 1: biochemical and functional studies on the thymidine kinase of the highly resistant R100 strain 303

A. Vafai, K. Jensen and R. Kubo (U.S.A.)
Existence of similar antigenic-sites on varicella-zoster virus gpI and gpIV 319

T. Takegami and S. Hotta (Japan)
In vitro synthesis of Japanese encephalitis virus (JEV) RNA: membrane and nuclear fractions of JEV-infected cells possess high levels of virus-specific RNA polymerase activity 337
